21<sup>st</sup> CENTURY PROJECT LETTER #05-008

TO: All 21<sup>st</sup> Century Project Stakeholders

RE: **HUMAN RESOURCES SYSTEM SURVEY**

Last April the State Controller's Office 21st Century Project selected SAP as the commercial software product to replace the State's current centralized human resource and payroll system. The procurement for system integration services is underway with an expectation the intent to award will be made in January 2006.

In preparing for the management of changes the new system will introduce, the 21st Century Project conducted a survey requesting information regarding state department's operation of internal computer applications that support administrative functions. Following, is a link to the survey's results.
